CLAIMS

What is claimed is:

An apparatus for determining a discount for a customer of a retail establishment, said apparatus comprising:

an input device for generating an identifier signal indicative of a customer's identification; and

a signal processing system responsive to said-identifier signal, and having memory for storing signals including program signals defining an executable process for calculating a second discount based on a predefined time period from signals stored in said memory indicative of a date of a last visit of the customer to the retail establishment and a first discount.

- 2. The apparatus of claim 1, where it said input device includes a keypad.
- The apparatus of claim 1, wherein said input device includes at least one of a scanning 3. device for scanning an encoded bar code, a magnetic storage medium, an optical storage medium.
- The apparatus of claim 1, wherein said process further applies said second discount to a purchase of the customer at the retail establishment.
- The apparatus of claim 1, wherein said process determines said second discount upon 5. expiration of said pre-defined time period, wherein said pre-defined begins at a pre-defined date.
- The apparatus of claim 1, wherein said process determines said second discount by
- increasing said first discount by a pre-defined value if said date of said last visit is within said
- 3 pre-defined time period.
- 7. The apparatus of claim 1, wherein said process determines said second discount by 1
- decreasing said first discount by a pre-defined value if said date of said last visit is prior to said 2
- pre-defined time period. 3
- The apparatus of claim 1, wherein said process determines said second discount by
 - decreasing said second discount to a pre-defined minimum discount if said date of said last visit
 - is prior to said pre-defined time period.

- The apparatus of claim 1, wherein said process updates said date of said last visit of the customer with a date of a present visit of the customer to the retail establishment; and to update > said first discount with said second discount.
- The apparatus of claim 9, wherein said process further updates said date of said last visit 10. 1
- if a purchase of the customer is greated than a pre-defined value 2
- The apparatus of claim 1, wherein said process further applies a second discount to a 1 11.
- purchase of the customer if the purchase is greater than a pre-defined value. 2
- 12. The apparatus of claim 1, wherein said process determines said second discount at a 1
- present visit of the customer to the relail establishment. 2
 - 13. The apparatus of claim 1, wherein said process further accesses a date indicative of the last time said first discount changed.
 - The apparatus of claim 13, wherein said process determines said second discount by 14. increasing said first discount by a pre-defined value if said date of said last visit is within said
 - pre-defined time period and if said date said first discount changed is prior to a second pre-
- defined time period.
 - The apparatus of claim 1, wherein said process further generates a coupon including said 15. identifier.
 - An apparatus for determining a discount for a customer, the apparatus comprising: an input device for generating an identifier signal indicative of a first conditional discount and a first date indicative of an expiration date of said first conditional discount; and
 - a signal processing system, responsive to said identifier signal, and having memory for storing signals including program signals defining an executable process for calculating a first earned discount based on a pre-defined time period from signals indicative of stored in said memory indicative of said first conditional discount and said first date; for calculating a second conditional discount by increasing said first earned discount by a pre-defined value; and for generating a second identifier indicative of said second conditional discount and a second date indicative of an expiration of said second conditional discount.

- 2 to a purchase of the customer at the retail establishment.
- 1 18. The apparatus of claim 16, wherein said process determines said first earned discount is
- 2 equal to said first conditional discount if said first date occurs within said pre-defined time
- 3 period.
 - 19. The apparatus of claim 16, wherein said process determines said first earned discount is equal to said first conditional discount decreased by a pre-defined value if said first date occurs outside of said pre-defined time period.
- 1 20. The apparatus of claim 16, wherein said process determines said first earned discount is
- zero discount if said first date occurs outside of said pre-defined time period.
- 1 21. The apparatus of claim 16, wherein said input device includes a scanning device for
- 2 scanning an encoded bar code, a magnetic storage medium, or an optical storage medium.
- 1 22. A computer encoded with computer program code for:
- receiving an identifier representative of the customer;
 - accessing data, in response to said identifier, from memory relating to the customer, a
- date of a last visit of a customer to the retail establishment, and a first discount; and
 - determining a second discount based on said first discount and a relationship of said date
- of said last visit of the customer and a pre-defined time period.
- 1 23. The computer of claim 22, the computer program code further for applying said second
- discount to a purchase of the customer at the retail establishment.
- 1 24. The computer of claim 22, wherein said second discount is a percentage discount of said
- 2 purchase of the customer.
- 1 25. The computer of claim 22, wherein determining said second discount is performed upon
- 2 the expiration of said pre-defined time period, and wherein said pre-defined time period begins at
- 3 a pre-defined date.

CATED TERM

- 1 26. The computer of claim 22, wherein determining said second discount comprises
- 2 increasing said first discount by a pre-defined value if said date of said last visit is within said
- 3 pre-defined time period.
- 1 27. The computer of claim 22, wherein determining said second discount comprises
- decreasing said first discount by a pre-defined value if said date of said last visit is prior to said
- 3 pre-defined time period.
- 1 28. The computer of claim 22, wherein determining said second discount comprises
- decreasing said second discount to a pre-defined minimum discount if said date of said last visit
- 3 is prior to said pre-defined time period.
 - 29. The computer of claim 22, the computer program code further for:

 updating said date of said last visit of the customer with a date of a present visit of the customer to the retail establishment; and updating said first discount with said second discount.
 - 30. The computer of claim 29, wherein updating said date of said last visit is performed if a purchase of the customer is greater than a pre-defined value.
- The computer of claim 22, the computer program code further for applying a second discount to a purchase of the customer if the purchase is greater than a pre-defined value.
- 1 32. The computer of claim 22, wherein determining said second discount is performed at a present visit of the customer to the retail establishment.
 - 733. The computer of claim 22, the computer program code further for performs accessing a date indicative of the last time said first discount changed.
 - 34. The computer of claim 33, wherein determining said second discount comprises
- 2 increasing said first discount by a pre-defined value if said date of said last visit is within said
- 3 pre-defined time period and if said date said first discount changed is prior to a second pre-
- 4 defined time period.
- 1 35. The computer of claim 22, wherein said memory is associated with said computer.

5

6

7

8

1

- 1 36. The computer of claim 22 wherein said memory is associated with a card.
- 1 37. The computer of claim 22, wherein said identifier comprises an encoded bar code, a
 2 magnetic storage medium and an optical storage medium.
- 1 38. The computer of claim 22, the computer program code further for generating a coupon including said identifier.
- 1 39. A computer encoded with computer program code for:
 2 receiving a first identifier indicative of a first conditional discount and a first date
 3 representative of the expiration of said first conditional discount;
 - determining a first earned discount in accordance with said first conditional discount and said first date occurring within a pre-defined time period;
 - determining a second conditional discount by increasing said first earned discount by a pre-defined value; and
 - generating a second identifier indicative of said second conditional discount and a second date representative of the expiration of said second conditional discount.
 - 40. The computer of claim 39, the computer program code further for applying said first earned discount to a purchase of the customer at the retail establishment.
- 1 41. The computer of claim 39, wherein determining said first earned discount comprises 2 determining said first earned discount to be equal to said first conditional discount if said first 3 date occurs within said pre-defined time period.
 - 42. The computer of claim 39, wherein determining said first earned discount comprises decreasing to said first conditional discount by a pre-defined value if said first date occurs outside of said pre-defined time period.
- 1 43. The computer of claim 30, wherein determining said first earned discount comprises
- determining said first earned discount to be zero discount if said first date occurs outside of said
- 3 pre-defined time period.
 - 44. The computer of claim 39, wherein said first and second identifier comprises an encoded bar code, a magnetic storage medium and an optical storage medium.

A storage medium encoded with machine-readable computer program code for: receiving an identifier representative of the customer;

accessing data, in response to said identifier, from memory relating to the customer, a date of the last visit of a customer to the retail establishment, and a first discount; and

determining a second discount based on said first discount and a relationship of said date of said last visit of the customer and a pre-defined time period.

- 1 46. The storage medium of claim 45, the computer program code further for applying said second discount to a purchase of the customer at the retail establishment.
- 1 47. The storage medium of claim 45, wherein said second discount is a percentage discount 2 of the purchase of the customer.
- 1 48. The storage medium of claim 45, wherein determining said second discount is performed upon the expiration of said pre-defined time period, wherein said pre-defined begins at a pre-defined date.
- 1 49. The storage medium of claim 45 wherein determining said second discount comprises 2 increasing said first discount by a pre-defined value if said date of said last visit is within said 3 pre-defined time period.
- The storage medium of claim 45, wherein determining said second discount comprises decreasing said first discount by a pre-defined value if said date of said last visit is prior to said pre-defined time period.
- 1 51. The storage medium of claim 45, wherein determining said second discount comprises
- 2 decreasing said second discount to a pre-defined minimum discount if said date of said last visit
- 3 is prior to said pre-defined time period.
 - 52. The storage medium of claim 45, the computer program code further for:

 updating said date of said last visit of the customer with a date of a present visit of the customer to the retail establishment; and

 updating said first discount with said second discount.
- 1 53. The storage medium of claim 52, wherein updating said date of said last visit is 2 performed if a purchase of the customer is greater than a pre-defined value.

- 1 54. The storage medium of claim 45, the computer program further for applying a second
- discount to a purchase of the customer if the purchase is greater than a pre-defined value.

- 1 55. The storage medium of claim 45, wherein determining said second discount is performed
- at a present visit of the customer to the retail establishment.

Soliy

- 56. The storage medium of claim 45, the computer program further for accessing a date indicative of said last time said first discount changed.
- The storage medium of claim 56, wherein determining said second discount comprises increasing said first discount by a pre-defined value if said date of said last visit is within said pre-defined time period and if said date said first discount changed is prior to a
- second pre-defined time period.
 - The storage medium of claim 45 the computer program code further for generating a coupon including said identifier.
 - The storage medium of claim 45, wherein said identifier comprises an encoded bar code, a magnetic storage medium and an optical storage medium.
- 1 60. The storage medium of claim 45, wherein said storage medium is associated with a computer.
- 1 61. The storage medium of claim 45, wherein/said storage medium is associated with a card.
- 1 62. The storage medium of claim 45, in which the medium is at least one of an electronic storage medium, magnetic storage medium and optic storage medium.
- 1 63/ A storage medium encoded with machine-readable computer program code for:
- receiving a first identifier indicative of a first conditional discount and a first date
- 3 representative of the expiration of said first conditional discount;
- determining a first earned discount in accordance with said first conditional discount and said first date occurring within a pre-defined time period;

- 1 64. The storage medium of claim 63, the computer program code further for applying said first earned discount to a purchase of the customer at the retail establishment.
- 1 65. The storage medium of claim 63, wherein determining said first earned discount
- 2 comprises determining said first earned discount to be equal to said first conditional discount if
- said first date occurs within said predefined time period.
- 1 66. The storage medium of claim 63, wherein determining said first earned discount
 2 comprising decreasing to said first conditional discount by a pre-defined value if said first date
 3 occurs outside of said pre-defined time period.
- 1 67. The storage medium of claim 63, wherein determining said first earned discount comprising determining said first earned discount to be zero discount if said first date occurs outside of said pre-defined time period.
 - 68. The storage medium of claim 63, wherein said first identifier and second identifier each comprise an encoded bar code.
 - 69. A method for determining a discount for a customer of a retail establishment, said method comprising:

receiving an identifier representative of the customer;

accessing data, in response to said identifier, from memory relating to the customer, a date of the last visit of a customer to the retail establishment, and a first discount; and

determining a second discount based on said first discount and a relationship of said date of said last visit of the customer and a pre-defined time period.

- 1 70. The method of claim 69, further comprising applying said second discount to a purchase
- 2 of the customer at the retail establishment,
- 1 71. The method of claim 69, wherein said second discount is a percentage discount of the
- 2 purchase of the customer.

San Sand

1

2

- 1 73. The method of claim 69, wherein determining said second discount comprises increasing
- 2 said first discount by a pre-defined value if said date of said last visit is within said pre-defined
- 3 time period.
- 1 74. The method of claim 69, wherein determining said second discount comprises decreasing
- 2 said first discount by a pre-defined value if said date of said last visit is prior to said pre-defined
- 3 time period.
- The method of claim 69, wherein determining said second discount comprises decreasing said second discount to a pre-defined minimum discount if said date of said last visit is prior to said pre-defined time period.
 - 76. The method of claim 69, further comprising:

 updating said date of said last visit of the customer with a date of a present visit of the customer to the retail establishment; and

 updating said first discount with said second discount.
 - 77. The method of claim 76, wherein updating said date of said last visit is performed if a purchase of the customer is greater than a pre-defined value.
- 1 78. The method of claim 69, further comprising.
- applying a second discount to a purchase of the customer if the purchase is greater than a pre-defined value.
- 79. The method of claim 69, wherein determining said second discount is performed at a present visit of the customer to the retail establishment.
 - 80. The method of claim 69, further comprising:

 accessing a date indicative of the last time said first discount changed.
- 1 81. The method of claim 80, wherein determining said second discount comprises increasing said first discount by a pre-defined value if said date of said last visit is within said pre-defined

- time period and if said date said first discount changed is prior to a second pre-defined time
- 4 period.

2 3

- 82. The method of claim 69, further including: 1
- 2 generating a coupon including said identifier.
- 83. The method of claim 69, wherein said identifier comprises an encoded bar code, a 1
- 2 magnetic storage medium and an optical storage medium.
- The method of determining a discount for a customer; the method comprising: 1 2 receiving a first identifier indicative of a first conditional discount and a first date representative of the expiration of said first conditional discount;

determining a first earned discount in accordance with said first conditional discount and said first date occurring within a pre-defined time period;

determining a second conditional discount by increasing said first earned discount by a pre-defined value; and

generating a second identifier indicative of said second conditional discount and a second date representative of the expiration of said second conditional discount.

- The method of claim 84, further comprising: 85. applying said first earned discount to a purchase of the customer at the retail establishment.
- The method of claim 84, wherein said first earned discount is equal to said first 1 conditional discount if said first date occurs within said pre-defined time period. 2
 - 87. The method of claim 84, wherein said first earned discount is equal to said first conditional discount decreased by a pre-defined value if said first date occurs outside of said predefined time period.
 - The method of claim 84, wherein said first earned discount is zero discount if said first 88.
- date occurs outside of said pre-defined time period.
 - 89. The method of claim 84, wherein said first and second identifier comprises an encoded bar code, a magnetic storage medium and an optical storage medium.
